

DOT GALLERY RESIDENCY CALL

About DOT

WHAT?

DOT is an affiliate program of the Open City Design Institute. OCDI is an independent non-profit organization that engages the city through public programs, exhibitions, competitions, publications, research, learning and practice.

The Spatial Installation Residency aligns itself with OCDI + DOT ideology: the city is a campus for learning, practice, and production. The residency invites Contemporary artists to spend time researching and creating a project, seeing it to fruition in the DOT Gallery.

WHERE?

The first iteration of DOT will be located within the Mitchell-Copp Facade, at 315 Portage Avenue, Winnipeg, Canada. The space is essentially a cylinder with a 9' diameter and 11' tall. This is the primary node of DOT Gallery, however DOT is interested in exposing other unused or vacant spaces in the city. Please contact if you are interested in a different space.

WHEN?

DOT is always accepting applications for the residency. The artists receive 3 weeks to devote towards research, creation and production, and 3 weeks for exhibition. The remaining 3 weeks are to be allocated to either portion of the residency - wherever the artist deems time most befitting.

About Residency
